

WHY CHOOSE SUB-IRRIGATION FOR YOUR PROJECT?

WATER CONSERVATION

Reduce overspray by efficiently irrigating the roots

Reduce evaporation by supplying water to where it matters

Reduce water runoff and pollution

MAINTENANCE AND COST IMPROVEMENTS

Reduce damage to hardscape

Reduced cost to maintain

Reduced weeds and use of weed killer

Reduced cost to install

Reduced liability for owner

Our sub-irrigation reservoir tank system can convert any planter to a capillary action irrigation system. Reservoir tanks come in a variety of shapes and sizes which can be configured to any planter design, from standard decorative pots to custom design build installations. The reservoir tanks are easy to install and easy to maintain. Go to 7technical.com for more information.
